### FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

NFPA 2008 edition  
Revised Feb 2010

|  |                  |                    |
|--|------------------|--------------------|
| <b>STATION A - SCBA OPERATIONAL CHECK</b>  | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Mandatory Station JPR 5.5.1</b> | <b>Test Site</b> |                    |

**Directions:** Make a pre-use operational check of your SCBA; announce out loud what you are checking and what conditions you find as you proceed. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 12 of the 12 items being preformed correctly

| No. | Task Steps   | Initial Test |    | Retest |    |
|-----|--|--------------|----|--------|----|
|     |  | Yes          | No | Yes    | No |
| 1.  | Checks backpack assembly condition for wear or damage                                |              |    |        |    |
| 2.  | Checks straps for full extension and tangles   |              |    |        |    |
| 3.  | Checks cylinder pressure for manufacturer's recommended capacity                     |              |    |        |    |
| 4.  | Opens cylinder valve and checks high pressure connection and hose assembly for leaks |              |    |        |    |
| 5.  | Checks main line valve for proper operation  |              |    |        |    |
| 6.  | Checks regulator pressure gauge to see if it matches cylinder gauge (+/- 100 psi)    |              |    |        |    |
| 7.  | Checks regulator control position for accessibility                                  |              |    |        |    |
| 8.  | Checks emergency by-pass for proper operation  |              |    |        |    |
| 9.  | Checks service life alarm for proper operation                                       |              |    |        |    |
| 10. | Checks facepiece assembly for cracks, tears or broken head straps                    |              |    |        |    |
| 11. | Checks head straps for full extension  |              |    |        |    |
| 12. | Were all tasks completed in a SAFE manner? ("NO" indicates automatic failure)        |              |    |        |    |

|           |           |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|  |                  |                    |
|--|------------------|--------------------|
| <b>STATION B - SCBA DONNING</b>  | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5</b><br>Mandatory Station <b>JPR 5-3.1</b> | <b>Test Site</b> |                    |

**Directions:** While wearing full protective clothing (helmet, hood, boots, gloves, coat and trousers), demonstrate donning of Self Contained Breathing Apparatus (SCBA). Be fully prepared to enter a hazardous environment within 60 seconds from the beginning of the timed evolution. Time does not include donning and preparation of protective equipment, time evolution begins when SCBA unit is touched by candidate for operation or donning. Do you have any questions?

**Note to Evaluator:** Precise sequence of steps #3 through #8 may vary, depending on different makes/models of SCBA and training provided

**Performance Outcome:** Pass/ Fail will be determined by 17 of the 17 items being preformed correctly

| No  | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1.  | Sets backpack in place on back  |              |    |        |    |
| 2.  | Secures all straps on SCBA  |              |    |        |    |
| 3.  | Dons facepiece and straps   |              |    |        |    |
| 4.  | Checks for facepiece seal   |              |    |        |    |
| 5.  | Confirms exhalation valve operation                                     |              |    |        |    |
| 6.  | Connects to regulator / facepiece                                       |              |    |        |    |
| 7.  | Opens cylinder valve fully  |              |    |        |    |
| 8.  | Opens mainline valve fully (if applicable)                              |              |    |        |    |
| 9.  | Checks donning mode switch (if applicable)                              |              |    |        |    |
| 10. | All closures secure on coat/trousers                                    |              |    |        |    |
| 11. | Coat collar up and secured  |              |    |        |    |
| 12. | Gloves on   |              |    |        |    |
| 13. | Hood donned properly and in place                                       |              |    |        |    |
| 14. | Helmet with chin strap in place   |              |    |        |    |
| 15. | PASS Device activated   |              |    |        |    |
| 16. | Completed in 60 seconds or less (Record Time) _____<br>Seconds          |              |    |        |    |
| 17. | Tasks completed in a SAFE manner? (“NO” indicates<br>automatic failure) |              |    |        |    |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|  |                  |                    |
|--|------------------|--------------------|
| <b>STATION C – PRIMARY SEARCH &amp; UTILITIY CONTROL</b>   | <b>Test Date</b> | <b>Candidate #</b> |
| Reference NFPA 1001 - 200 Edition, Chapter 5<br>Mandatory Station JPRs 5-3.1; 5-3.5; 5-3.9; 5-3.18 | <b>Test Site</b> |                    |

**Directions:** Using full protective clothing, SCBA and a hand tool, perform a primary search with a partner following a rope, hose, or using wall contact, maintaining communications and team integrity, shut off utilities (electric and gas) as designated by the evaluator and exit the hazardous environment as a team. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 14 of the 14 items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1.  | Selects proper tool for search  |              |    |        |    |
| 2.  | Checks door for heat level before entering.   |              |    |        |    |
| 3.  | Stays low to the floor.   |              |    |        |    |
| 4.  | Communicates effectively (verbal/visual/touch).   |              |    |        |    |
| 5.  | Maximum coverage, sweeps with tool or body.   |              |    |        |    |
| 6.  | Executes "crawl-under" correctly.   |              |    |        |    |
| 7.  | Executes "crawl-over" correctly.  |              |    |        |    |
| 8.  | Executes "restricted passages" correctly.   |              |    |        |    |
| 9.  | Completes evolution before quarter (1/4) service alarm sounds.  |              |    |        |    |
| 10. | Shuts off electric panel correctly.   |              |    |        |    |
| 11. | Shuts off gas meter correctly.  |              |    |        |    |
| 12. | Operates by-pass / purge on command.  |              |    |        |    |
| 13. | Exits hazardous area as a team so that a safe haven is found before exhausting air supply, others are not endangered, and team integrity is maintained. |              |    |        |    |
| 14. | Were tasks completed in a SAFE manner? (NO indicates automatic failure)   |              |    |        |    |
|     |   |              |    |        |    |

**FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST**

|   |                  |                    |
|---|------------------|--------------------|
| <b>STATION D - SCBA CYLINDER REMOVAL, REFILL &amp; REPLACEMENT</b>                | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPR 5-3.1</b> | <b>Test Site</b> |                    |

**Directions:** Please remove your SCBA cylinder, refill it using a cascade system, and replace it on your SCBA harness. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 16 of the 16 items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1.  | Checks main valve to determine that the cylinder is off.                |              |    |        |    |
| 2.  | Removes high pressure hose from cylinder.                               |              |    |        |    |
| 3.  | Removes cylinder from harness.  |              |    |        |    |
| 4.  | Inspects cylinder for damage.   |              |    |        |    |
| 5.  | Checks hydrostatic test date.   |              |    |        |    |
| 6.  | Connects fill while in charging sleeve.                                 |              |    |        |    |
| 7.  | Begins with lowest cascade cylinder.                                    |              |    |        |    |
| 8.  | Opens SCBA cylinder and charging valve.                                 |              |    |        |    |
| 9.  | When equalized, closes cascade valve.                                   |              |    |        |    |
| 10. | Continues steps 8 and 9 until full.                                     |              |    |        |    |
| 11. | Closes all valves and releases pressure.                                |              |    |        |    |
| 12. | Disconnects charging hose.  |              |    |        |    |
| 13. | Replaces cylinder in harness assembly.                                  |              |    |        |    |
| 14. | Checks high pressure hose O-ring.                                       |              |    |        |    |
| 15. | Records refill on sheet correctly                                       |              |    |        |    |
| 16. | Were tasks completed in a SAFE manner? (NO Indicates automatic failure) |              |    |        |    |
|     |   |              |    |        |    |

| <b>STATION E – ROOF / BASEMET CUT &amp;<br/>ROOF / BASEMENT VENTILATION</b>        | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPR 5-3.12</b> | <b>Test Site</b> |                    |

### FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

**Directions:** As an individual, appropriately place the provided ladder on the simulator; take the tools needed for ventilation per the scenario assigned; climb/cross the ladder; and cut a 2' X 2' hole in the roof / flooring material. Cut the first two sides with the power saw and the second two sides with an axe. Once the hole is cut, perform all other tasks needed to complete the ventilation task. Do you have any questions?

**Performance Outcome: Roof Evolution** Pass/ Fail will be determined by 18 of the 22 items being preformed correctly **Basement Evolution** Pass/ Fail will be determined by 14 of the 22 items being preformed correctly

**Evaluator:** Check the scenario tested \_\_\_ **A. Roof** \_\_\_ **B. Basement**

**NOTES TO EVALUATOR:** This skill evaluation does not test pre-inspection of the saw; however it is the responsibility of the candidate to ensure that the saw will work on the simulator. If the candidate fails to check the saw, and it does not work, runs out of gas, etc., while on the simulator, the station will be deemed unsatisfactorily completed.

| No. | Task Steps   | Initial Test |    | Retest |    |
|-----|--|--------------|----|--------|----|
|     |  | Yes          | No | Yes    | No |
| 1.  | Opens hooks on roof ladder. (if applicable)                      |              |    |        |    |
| 2.  | Checks to determine hooks are locked in place. (if applicable)   |              |    |        |    |
| 3.  | Places ladder flat on roof / floor.                              |              |    |        |    |
| 4.  | Secures ladder over roof peak. (if applicable)                   |              |    |        |    |
| 5.  | Selects, prepares, starts saw before mounting simulator.         |              |    |        |    |
| 6.  | Stops saw.   |              |    |        |    |
| 7.  | Places tools and STOPPED saw on ladder.                          |              |    |        |    |
| 8.  | Sounds roof / floor with tool while ascending / crossing.        |              |    |        |    |
| 9.  | Locates rafters / floor joist and checks roof / floor integrity. |              |    |        |    |
| 10. | Starts saw and makes top cut and far cut.                        |              |    |        |    |
| 11. | Maintains secure footing while cutting.                          |              |    |        |    |
| 12. | Maintains control of saw.  |              |    |        |    |
| 13. | Makes cuts in a straight line.                                   |              |    |        |    |
| 14. | Saw chain / blade does not bind / seize up.                      |              |    |        |    |
| 15. | Shuts down saw and transitions to axe.                           |              |    |        |    |
| 16. | Demonstrates acceptable hand position on axe handle.             |              |    |        |    |
| 17. | Controls swing and arc   |              |    |        |    |
| 18. | Cuts in sequential order / alignment.                            |              |    |        |    |
| 19. | Shows acceptable feet / body position.                           |              |    |        |    |
| 20. | Completes cut, removes debris with tool.                         |              |    |        |    |

|     |   |  |  |  |  |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|   |                  |                    |
|---|------------------|--------------------|
| <b>STATION F – GROUND LADDERS</b>   | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Mandatory Station JPR's 5-3.6; 5-3.9</b> | <b>Test Site</b> |                    |

**Directions:** As a team, remove the extension ladder from the apparatus. Carry the ladder to the building, place it, raise it, extend the fly section, and set for rescue operations. Secure the ladder at the top and/or bottom. Using your partner as a conscious, non-injured victim, assist him down the ladder. Change positions and assist the second victim down the ladder. Untie, lower, and return the ladder to the apparatus. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by passing both Part A and B. **Note 9a, 14a and 3b are MANDATORY.** *PART A:* PASS/FAIL will be determined by “14” YES Marks. *PART B:* PASS/FAIL will be determined by “3” YES Marks

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1a. | Team removes ladder from apparatus and prepares for a two-person carry.                 |              |    |        |    |
| 2a. | Team assumes acceptable position during carry.  |              |    |        |    |
| 3a. | Team places ladder in line with target.   |              |    |        |    |
| 4a. | Team raises ladder properly.  |              |    |        |    |
| 5a. | Team extends fly to correct level for rescue.   |              |    |        |    |
| 6a. | Team checks ladder for proper angle / position.   |              |    |        |    |
| 7a. | Team secures halyard.   |              |    |        |    |
| 8a. | One candidate is assigned to climb ladder and enter window.                             |              |    |        |    |
| 9a. | Team secures ladder at top <u>and/or</u> bottom. (MANDATORY SKILL TO PASS)              |              |    |        |    |
| 10a | Team tests ladder for security by attempting to move top or bottom of ladder.           |              |    |        |    |
|     | <b><i>Part B Rescue Assist Work</i></b>   |              |    |        |    |
| 1b. | Candidate on ground climbs ladder and assists victim (candidate in window) onto ladder. |              |    |        |    |
| 2b. | Candidate on ladder assists victim down ladder.   |              |    |        |    |
|     | <b><i>CANDIDATES WILL SWITCH ROLES AND REPEAT THE TASK</i></b>                          |              |    |        |    |
| 3b. | Was rescue assist performed in a SAFE manner? (NO indicates automatic failure)          |              |    |        |    |
|     | <b><i>Part A Ground Ladder Work Continues to Completion</i></b>                         |              |    |        |    |
| 11a | Team unties ropes that are securing ladder.   |              |    |        |    |
| 12a | Team retracts fly and lowers ladder.  |              |    |        |    |
| 13a | Team lifts and carries ladder to apparatus.   |              |    |        |    |
| 14a | Were tasks completed in a SAFE manner? (NO indicates automatic failure)                 |              |    |        |    |
|     |   |              |    |        |    |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|   |                  |                    |
|---|------------------|--------------------|
| <b>STATION G - KNOT TYING &amp; TOOL / EQUIPMENT HOISTING</b>   | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPRs 5-1.1; 5-1.2; 5-3.11; 5-3.12</b> | <b>Test Site</b> |                    |

**Directions:** Using an appropriate fire service knot, the candidate will tie knots, bends, and hitches to haul hose and ventilation equipment.

- 1 Using an approved fire service knot, raise and lower a ventilation tool. Remove the knots.
2. Next, tie a clove hitch, a half-hitch and an overhand safety knot on the uncharged hoseline. Raise and lower the hoseline. Remove the knots.
3. Tie a bowline around an exhaust fan.
4. Finally, tie a figure of eight on a bight. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 9 of the 13 items being performed correctly

| No. | Task Steps   | Initial Test |    | Retest |    |
|-----|--|--------------|----|--------|----|
|     |  | Yes          | No | Yes    | No |
| 1   | Ties an appropriate fire service knot or hitch onto or around a ventilation tool.                                    |              |    |        |    |
| 2   | Ties a half-hitch on the handle.   |              |    |        |    |
| 3   | Ties a guideline to hoist line, using an appropriate knot or hitch   |              |    |        |    |
| 4   | Performs and controls hoisting, lowering, and guiding of evolution.  |              |    |        |    |
| 5   | Removes knots.   |              |    |        |    |
|     | ___ Clove Hitch with Half Hitch    ___ Becket or Sheet Bend<br>___ Figure Eight on a Bight                           |              |    |        |    |
| 6   | Ties a clove hitch and a half-hitch onto an uncharged hoseline.  |              |    |        |    |
| 7   | Ties an overhand safety knot to secure the clove hitch on the uncharged hoseline                                     |              |    |        |    |
| 8   | Performs and controls hoisting, lowering, and guiding of evolution.  |              |    |        |    |
| 9   | Removes knots.   |              |    |        |    |
| 10  | Ties bowline around an exhaust fan   |              |    |        |    |
| 11  | Ties figure of eight on a bight. (Unless accomplished on ventilation tool)   |              |    |        |    |
| 12  | Join two pieces of rope together using a proper knot or hitch to hoist line (Unless accomplished on tool hoist line) |              |    |        |    |

**FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST**

**Directions:** As a team, load a 1-1/2" hose line and a 2-1/2" hose line in the designated compartments on the pumper using appropriate hose loads for an effective fire ground attack. On signal from the evaluator, advance the 2-1/2" hose line inside the building, up the stairs to the second floor prepared to attack the fire. Then change positions and advance the 1-1/2" hose line up the extension ladder into the second floor and prepare to attack the fire on the first floor going down the interior stairs. Be sure to call for the line to be charged when ready to attack each fire. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 12 of the 16 items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Team appropriately loads hose lines on apparatus.                       |              |    |        |    |
| 2   | Team executes 2-1/2" hose load transfer from hose bed to shoulder.      |              |    |        |    |
| 3   | Team advances 2-1/2" hose line to first floor.                          |              |    |        |    |
| 4   | Team positions hose in stairwell for attack to the second floor.        |              |    |        |    |
| 5   | Team orders hose line charged.  |              |    |        |    |

**FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST**

**DIRECTIONS:** As a member of a team, with SCBA and carrying a hand tool, climb a secured extension ladder, enter the window opening and perform a search to locate a victim. Given that the conditions within the structure have fire on the floor above the designated search floor, ventilation operations will be required. Using the proper patient drag or carry, remove the victim to an area of safety on the fire floor or stairwell. Search and rescue should be completed without depleting the rescuer’s air supply. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 9 of the 12 items being preformed correctly

| No  | Task Steps   | Initial Test |    | Retest |    |
|-----|--|--------------|----|--------|----|
|     |  | Yes          | No | Yes    | No |
| 1.  | Selects the proper search and rescue hand tools?   |              |    |        |    |
| 2.  | Proper climbing technique is used on the ladder with the hand tool?                                    |              |    |        |    |
| 3.  | Checks floor for stability prior to making entry from window?  |              |    |        |    |
| 4.  | Performs proper ventilation techniques?  |              |    |        |    |
| 5.  | As a team performs proper search technique?  |              |    |        |    |
| 6.  | Keeps search confined to the area specified? (As directed by the evaluator.)                           |              |    |        |    |
| 7.  | Locates victim?  |              |    |        |    |
| 8.  | Remove victim to safe position or location?  |              |    |        |    |
| 9.  | Notification is made to IC (Evaluator) of victim find and location?                                    |              |    |        |    |
| 10. | Utilizes proper patient drag or carry to move an unconscious patient?                                  |              |    |        |    |
| 11. | Provides for protection of victim’s airway?  |              |    |        |    |
| 12. | Maintains team integrity throughout search operations?   |              |    |        |    |
| 13. | Were all tasks completed in a safe manner? (A no answer is an automatic failure of the entire station) |              |    |        |    |

### FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

**Directions:** As a team, inspect each salvage cover provided; indicate verbally what you are doing and what you find. As a team, fold one cover into a "one-man" roll and the other into a "two-man" fold. Then arrange all the furnishing into an area and cover all them with a salvage cover. Once completed, remove the cover. Next, construct a water chute using one cover and properly position it for use. Finally, from the second cover, construct a catchall. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 18 of 26 the items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Spreads both salvage covers for inspection.                           |              |    |        |    |
| 2   | Checks for dirt, mildew, rot, holes or other damage.                  |              |    |        |    |
| 3   | Explains how repairs will be made.                                    |              |    |        |    |
| 4   | Explains cleaning and drying procedures.                              |              |    |        |    |
| 5   | Prepares cover and makes a one-man fold.                              |              |    |        |    |
| 6   | Demonstrates neatness and stability of finished fold.                 |              |    |        |    |
| 7   | Prepares cover and makes a two-man fold.                              |              |    |        |    |
| 8   | Demonstrates neatness and stability of finished fold                  |              |    |        |    |
| 9   | Prepares arranges all furnishing / contents in an area to be covered. |              |    |        |    |
| 10  | Deploys the salvage cover.  |              |    |        |    |
| 11  | Makes final positioning / adjustment of cover.                        |              |    |        |    |
| 12  | Systematically removes the cover.                                     |              |    |        |    |
|     | <b><u>CONSTRUCT A WATER CHUTE</u></b>                                 |              |    |        |    |
| 13  | Positions step ladder to opening.                                     |              |    |        |    |
| 14  | Prepares salvage cover on floor.                                      |              |    |        |    |
| 15  | Positions salvage cover with weather side exposed.                    |              |    |        |    |
| 16  | Places pike poles on opposite sides of the cover.                     |              |    |        |    |
| 17  | Rolls poles inward from opposite sides.                               |              |    |        |    |
| 18  | Hooks poles to ladder rungs / extends to opening.                     |              |    |        |    |
| 19  | Completes final adjustment of chute.                                  |              |    |        |    |
|     | <b><u>CONSTRUCT WATER CATCHALL</u></b>                                |              |    |        |    |

|           |  |  |  |  |  |
|-----------|--|--|--|--|--|
| <b>20</b> | Prepares salvage cover on floor.                   |  |  |  |  |
| <b>21</b> | Positions salvage cover with weather side exposed. |  |  |  |  |
| <b>22</b> | Rolls opposite sides inward about 3 feet.          |  |  |  |  |
| <b>23</b> | Lays ends of side rolls over at right angle        |  |  |  |  |

|    |   |  |  |  |  |
|----|---|--|--|--|--|
| 24 | Rolls ends into tight roll and tucks into sides                         |  |  |  |  |
| 25 | Makes final position/adjustment   |  |  |  |  |
| 26 | Were tasks completes in a safe manner? (NO Indicates automatic failure) |  |  |  |  |
|    |   |  |  |  |  |

|           |           |

**FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST**

**Directions:** Using the equipment provided, extinguish the fire scenario presented. Be prepared to trade nozzle and back-up positions on the command of the evaluator. Do you have any questions?

**EVALUATOR: Check the scenario tested:**      \_\_\_\_ **A. Exterior Class "A"**      \_\_\_\_ **B. Dumpster**

**Performance Outcome:** Pass/ Fail will be determined by 7 of 9 the items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Team advances attack line in proper manner for scenario tested.   |              |    |        |    |
| 2   | Team positions themselves to avoid compromising safety during attach.   |              |    |        |    |
| 3   | Nozzleman properly operates and manipulates nozzle to knock down fire presented.  |              |    |        |    |
| 4   | Back-up fire fighter properly manipulates hose line to facilitate nozzleman's job.  |              |    |        |    |
| 5   | Team effectively breaks up materials involved to ensure water penetration and to expose and extinguish any hidden/residual fires.   |              |    |        |    |
| 6   | Team evaluates and indicates all materials are extinguished.  |              |    |        |    |
| 7   | Team assess for patterns of potential origin.   |              |    |        |    |
|     | <i>ON COMMAND OF EVALUATOR, TEAM RETREATS TO A SAFE LOCATION AND; NOZZLEMAN AND BACK-UP PERSON TRADE POSITIONS. A SECOND ATTACK IS THEN MADE, WITH EVALUATION OF #3 AND #4 MADE FOR NEW NOZZLEMAN AND BACK-UP PERSON.</i> |              |    |        |    |
| 8   | Was the fire extinguished? ( <u>MANDATORY SKILL TO PASS</u> )   |              |    |        |    |
| 9   | Were all tasks performed in a <u>SAFE</u> manner? (NO INDICATES AUTOMATIC FAILURE)  |              |    |        |    |

|                  |                  |

### FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

**Directions:** Select the proper portable extinguisher from the units present; attack and extinguish the fires presented. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 7 of 9 the items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Properly wears PPE.   |              |    |        |    |
| 2   | Selects proper extinguisher for class of fire presented.  |              |    |        |    |
| 3   | Activates extinguisher properly (pulls pin, activates cartridge, etc.) in accordance with specific extinguisher design. |              |    |        |    |
| 4   | Approaches fire from upwind (where and as applicable).  |              |    |        |    |
| 5   | Uses proper application technique for extinguisher and fire involved (range, nozzle motion, avoids "plunging", etc.).   |              |    |        |    |
| 6   | Completely extinguishes Class "B" fire.   |              |    |        |    |
| 7   | Completely extinguishes or achieves substantial knockdown of Class A Fire.  |              |    |        |    |
| 8.  | Properly retreats/back away from fire after extinguishing.  |              |    |        |    |
| 9   | Were all tasks completed in a <u>SAFE</u> manner? (NO INDICATES AUTOMATIC FAILURE)                                      |              |    |        |    |
|     |   |              |    |        |    |

**Directions:** Given PPE and an equipped fire apparatus, properly don your PPE within 60 seconds, board the apparatus and prepare yourself for travel. Upon command from the evaluator, dismount the apparatus and be prepared to complete the following assignment (less SCBA). Given all necessary personal protective equipment, and traffic and scene control devices, demonstrate the ability to set up a safe zone around the apparatus; and demonstrate the ability to slow, stop, release, and direct traffic around the safe zone. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 11 of 14 the items being preformed correctly

| No.  | Task Steps  | Initial Test |    | Retest |    |
|--|---|--------------|----|--------|----|
|  |   | Yes          | No | Yes    | No |
| 1  | Completely dons protective clothing within 60 seconds prior to boarding.  |              |    |        |    |
| 2  | Checks seat area for obstruction, loose tools, etc. (Removes same, if present.)   |              |    |        |    |
| 3  | Uses handrails/secures good footing while mounting.   |              |    |        |    |
| 4  | Sits in seat provided, engages seatbelt/shoulder harness assembly provided.   |              |    |        |    |
| 5  | Dons hearing protection (if open or canopy cab).  |              |    |        |    |
| 6  | Uses eye protection (if open or canopy cab).  |              |    |        |    |
| 7  | Uses handrails/secures good footing while dismounting.  |              |    |        |    |
| <b>EVALUATOR DIRECTS CANDIDATE TO DISMOUNT</b> |   |              |    |        |    |
| 8  | Wears all required protective clothing for the given traffic scenario.  |              |    |        |    |
| 9  | Places warning devices appropriately (i.e., 100 – 1,500 feet up stream from traffic).   |              |    |        |    |
| 10   | Establishes a one lane taper zone (75 – 100 feet) from apparatus using appropriate equipment.   |              |    |        |    |
| 11   | Identifies the work zone downstream of traffic.   |              |    |        |    |
| 12   | Establishes flagging station and signals appropriately to: <ul style="list-style-type: none"> <li>• Slow</li> <li>• Stop</li> <li>• Release</li> <li>• Direct traffic.</li> </ul> |              |    |        |    |
| 13   | Always faces approaching traffic when picking up the traffic control devices.   |              |    |        |    |
| 14   | Were all tasks completed in a <u>SAFE</u> manner? (NO INDICATES AUTOMATIC FAILURE)  |              |    |        |    |
|  |   |              |    |        |    |

|--|------------------|--------------------|
| <b>STATION T - REPLACING A BURST HOSE SECTION</b>  | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPRs 5-3.10; 5-5.2</b> | <b>Test Site</b> |                    |

**Directions:** You have before you a burst section of 1 ½” (or larger) hoseline. Using the equipment at this station, replace the burst section of line and indicate that the section is out-of-service (OOS). Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 6 of 7 the items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Team secures and deploys two (2) sections of replacement hose.                      |              |    |        |    |
| 2   | Team stops flow of burst line by applying hose clamp (if provided) or kinking hose. |              |    |        |    |
| 3   | Team disconnects burst section and substitutes replacement sections.                |              |    |        |    |
| 4   | Team removes burst section from vicinity of hose line.                              |              |    |        |    |
| 5   | Team marks/indicates that the defective section is out-of-service (OOS).            |              |    |        |    |
| 6   | Team appropriately rolls section of hose indicating OOS.                            |              |    |        |    |
| 7   | Were all tasks completed in a <u>SAFE</u> manner? (NO INDICATES AUTOMATIC FAILURE)  |              |    |        |    |
|     |   |              |    |        |    |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|  |                  |                    |
|--|------------------|--------------------|
| <b>STATION Y – NATURAL GROUND COVER FIRE ATTACK</b>                                | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPR 5-3.19</b> | <b>Test Site</b> |                    |

**Directions:** Acting as a team, attack and extinguish the ground cover fire that you are confronted with at this station, using the tools and equipment available. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 7 of 10 the items being preformed correctly

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Candidate selects and uses appropriate PPE.                                       |              |    |        |    |
| 2   | Candidate chooses appropriate tools, extinguisher, and/or hand line.              |              |    |        |    |
| 3   | Determines/identifies escape route(s), safe haven.                                |              |    |        |    |
| 4   | Determines exposure threats.  |              |    |        |    |
| 5   | Makes attack from proper direction based on wind, terrain, and fire.              |              |    |        |    |
| 6   | Constructs a fire line, if appropriate.   |              |    |        |    |
| 7   | Maintains integrity of fire line.   |              |    |        |    |
| 8   | Extinguishes fire with hand tools and/or water.                                   |              |    |        |    |
| 9   | Completes the assignment.   |              |    |        |    |
| 10  | Were all tasks performed in a <u>SAFE</u> manner? NO INDICATES AUTOMATIC FAILURE) |              |    |        |    |
|     |   |              |    |        |    |

|                   |                   |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|   |                  |                    |
|---|------------------|--------------------|
| <b>Z - EQUIPMENT INSPECTION &amp; MAINTENANCE</b>   | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPRs 5-5.1, 5-5.2</b> | <b>Test Site</b> |                    |

**Directions:** Before you are a section of hose, a nozzle, and a ground ladder. Inspect each piece of equipment for serviceability. As you perform each inspection, describe to the evaluator what you are looking for and what your findings are. Are there any questions?

**Performance Outcome:** Pass/ Fail will be determined by 14 of 20 the items being preformed correctly

| No. | Task Steps   | Initial Test |    | Retest |    |
|-----|--|--------------|----|--------|----|
|     |  | Yes          | No | Yes    | No |
|     | <b><u>HOSE</u></b>   |              |    |        |    |
| 1   | Checks outer jacket for wear and damage.   |              |    |        |    |
| 2   | Checks inner liner for dry rot and cracks.   |              |    |        |    |
| 3   | Checks coupling attachment/expansion rings.  |              |    |        |    |
|     | <b><u>COUPLINGS</u></b>  |              |    |        |    |
| 4   | Checks male threads for damage.  |              |    |        |    |
| 5   | Checks female threads for bending/damage.  |              |    |        |    |
| 6   | Removes and checks swivel gasket.  |              |    |        |    |
| 7   | Replaces swivel gasket.  |              |    |        |    |
| 8   | Explains the necessary maintenance for hose/couplings that should occur after use. |              |    |        |    |
|     | <b><u>NOZZLE</u></b>   |              |    |        |    |
| 9   | Checks for external damage.  |              |    |        |    |
| 10  | Checks for internal damage and debris.   |              |    |        |    |
| 11  | Checks gasket for damage.  |              |    |        |    |
| 12  | Checks for ease of operation.  |              |    |        |    |
| 13  | Explains the necessary maintenance that should occur after use.                    |              |    |        |    |
|     | <b><u>LADDERS</u></b>  |              |    |        |    |
| 14  | Examines all braces, slides, stops, locks, rivets and pulleys.                     |              |    |        |    |
| 15  | Examines halyard for damage.   |              |    |        |    |
| 16  | Checks pawls for ease of operation and tension.                                    |              |    |        |    |
| 17  | Checks rungs for tightness, bends and cracks.                                      |              |    |        |    |
| 18  | Checks beams for tightness, bends and cracks.                                      |              |    |        |    |
| 19  | Explains the necessary maintenance that should occur after use.                    |              |    |        |    |
| 20  | Were all tasks performed in a <u>SAFE</u> manner? NO INDICATES AUTOMATIC FAILURE)  |              |    |        |    |
|     |  |              |    |        |    |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|   |                  |                    |
|---|------------------|--------------------|
| <b>AA - INTERIOR STRUCTURAL LIVE FIRE ATTACK</b>                                    | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPRs 5-3.10</b> | <b>Test Site</b> |                    |

**Directions:** Attack as interior fire operating as a member of a 4eam, given an attack line, ladders when needed, personal protective equipment, tools , and an assignment, so that team integrity is maintained, the attack line is properly deployed for advancement, ladders are correctly placed when used, access is gained into the fire area, effective water application practices are used, the fire is approached safely, attack techniques facilitate suppression given the level of fire, hidden fires are located and controlled, the correct body posture is maintained, hazards are avoided or managed, and the fire is brought under control. Are there any questions?

**Performance Outcome:** Pass/ Fail will be determined by 8 of 11 the items being preformed correctly

**Evaluator:** Check the scenario tested (1 out of three must be tested). ALL scenarios will involve Class A fuel.

- A. 1<sup>st</sup> Floor room and contents**                     
  **B. 2<sup>nd</sup> Floor room and contents**                     
  **C. Basement contents**

| No. | Task Steps  | Initial Test |    | Retest |    |
|-----|---|--------------|----|--------|----|
|     |   | Yes          | No | Yes    | No |
| 1   | Team advances the attack line to the fire area directed.  |              |    |        |    |
| 2   | Nozzle man chooses the correct nozzle pattern and application technique for the type of fire attack chosen (direct or indirect) |              |    |        |    |
| 3   | Back-up team member(s) manipulate(s) the line to facilitate the nozzle man’s job.   |              |    |        |    |
| 4   | At the appropriate time the team advances the hoseline to the correct window and performs hydraulic ventilation.                |              |    |        |    |
| 5   | Did team members look for and control hidden fires if encountered? Evaluator will note the location of the hidden fire:         |              |    |        |    |
| 6   | Was the fire brought under control in a safe and effective manner with techniques used by the team members?                     |              |    |        |    |
| 7   | Were the proper tools and techniques used/applied by team members by team members?  |              |    |        |    |
| 8   | Did the team identify and avoid or control all hazards encountered?   |              |    |        |    |
| 9   | Was all PPE properly worn and used? (“NO” INDICATES AUTOMATIC FAILURE)  |              |    |        |    |
| 10  | Was team integrity & accountability maintained? (“NO” INDICATES AUTOMATIC FAILURE)  |              |    |        |    |
| 11  | Were the tasks completed in a SAFE manner? (NO” INDICATES AUTOMATIC FAILURE)  |              |    |        |    |
|     |   |              |    |        |    |

## FIRE FIGHTER I MENU SKILL PERFORMANCE CHECKLIST

|  |                  |                    |
|--|------------------|--------------------|
| <b>STATION AC - SCBA EMERGENCY OPERATIONS</b>  | <b>Test Date</b> | <b>Candidate #</b> |
| <b>Reference NFPA 1001 - 2008 Edition, Chapter 5<br/>Random Station JPR 5-3.1, 5.3.9</b> | <b>Test Site</b> |                    |

**Directions:** While wearing full protective clothing (helmet, hood, boots, gloves, coat and trousers) and a SCBA unit, the candidate shall demonstrate the following: a conservation of air breathing technique; a procedure for air flow interruption; a technique for air supply depletion. Do you have any questions?

**Performance Outcome:** Pass/ Fail will be determined by 4 of 4 the items being preformed correctly

**Evaluator:** Select one procedure from the conservation of air and the depletion of air tasks below; indicate to the candidate which option selected and mark the same on this skill sheet. All candidates must do the SCBA failure procedure.

| No.      | Task Steps  | Initial Test |    | Retest |    |
|----------|---|--------------|----|--------|----|
|          |   | Yes          | No | Yes    | No |
| <b>1</b> | <b>CONSERVATION OF AIR</b>  |              |    |        |    |
|          | <b>A) Upon command from the evaluator, demonstrate controlled breathing</b> (e.g., inhale through the nose, exhale through the mouth, and control breathing rate)   |              |    |        |    |
|          | <b>B) Upon command from the evaluator, demonstrate skip breathing</b> (e.g., take a breath and hold, take another breath, exhale, and repeat same)  |              |    |        |    |
| <b>2</b> | <b>DEPLETION OF AIR SUPPLY</b>  |              |    |        |    |
|          | <b>A) Emergency procedures when out of air with no air re-supply available</b> Activate pass device Establish filter breathing while staying as low as possible Exit hazardous area rapidly   |              |    |        |    |
|          | <b>B) Emergency procedures when out of air with trans-fill or buddy breathing capability available</b> Attach transfill hose or buddy breather hose to both SCBA units; exit hazardous area   |              |    |        |    |
| <b>3</b> | <b>SCBA FAILURE</b>   |              |    |        |    |
|          | <b>Emergency procedures when air is not flowing into the face piece:</b><br>Check that cylinder is fully open<br>Close mainline, if present<br>Open bypass slowly<br>Close bypass after each breath<br>Open bypass for next breath<br>Exit hazardous area rapidly |              |    |        |    |

|   |  |  |  |  |  |
